SUMMARY

Computer Science student at FAST NUCES Karachi and **ICPC Regional Bronze Medalist** with **600+ DSA problems solved** and one year of professional experience at **Neospark Solutions (Australia, Remote)**, progressing from Software Development Intern to Software Developer. Experienced in **Python, FastAPI, REST APIs, automation, web scraping, PostgreSQL, MongoDB, AI/LLM applications, and TypeScript**. Reduced a production multi-tenant onboarding workflow from **8 hours to under 1 hour**.

EXPERIENCE

Software Developer

Jun 2026 – Present

Neospark Solutions – Australia (Remote)

- Develop production **multi-tenant backend systems** using Python and FastAPI, including REST APIs, authentication, database workflows, and automation.
- Automated client onboarding using **Apify and web scraping**, reducing manual processing from approximately **8 hours to under 1 hour**.
- Build AI-assisted workflows, real-time **SSE pipelines**, file-processing systems, and integrations with cloud storage and databases.
- Collaborate remotely with an Australian engineering team through Git, code reviews, debugging, and continuous delivery.

Software Development Intern

Nov 2025 – Jun 2026

Neospark Solutions – Australia (Remote)

- Built backend features and APIs using **Python, FastAPI, MongoDB**, authentication systems, and admin dashboards for production applications.

PROJECTS

KhataLens – AI Financial Platform

Live

- Built an AI-powered platform using **FastAPI, PostgreSQL, React, TypeScript, Gemini, and OCR** to extract names, amounts, and payment status from handwritten business ledgers.
- Implemented a **RAG financial chatbot** supporting English and Roman Urdu for querying financial records and generating business insights.

EventHub – Event Management Platform

Live

- Developed a production-ready event platform using **FastAPI, SQLAlchemy, PostgreSQL, and Jinja2** with event management, dashboards, analytics, and approval workflows.
- Implemented **QR ticket validation**, digital tickets, and role-based access for organizers and attendees.

SyncScript – AI Knowledge Platform

Live

- Built a collaborative research platform using **Next.js, TypeScript, PostgreSQL, and Gemini RAG**, supporting real-time collaboration, document management, and semantic search.

ACHIEVEMENTS

- ICPC Regional Bronze Medalist** – Competitive Programming.
- Solved **600+ DSA problems** across Codeforces and LeetCode.
- Winner** – Vibe Coding Competition, IBA Probattle.
- 2X Runner-up** – Coders Cup 2024 and 2025.

EDUCATION

BS Computer Science

2023 – 2027

FAST National University of Computer & Emerging Sciences (FAST NUCES), Karachi

SKILLS

Languages: Python, C++, TypeScript, JavaScript, SQL

Backend: FastAPI, Flask, REST APIs, SSE, Authentication

Frontend: React, Next.js, HTML, CSS

Databases: PostgreSQL, MongoDB, SQLite, Redis

AI/ML: LLM Applications, RAG, Gemini, AI Automation, OCR

Automation: Apify, Web Scraping, Browser Automation, Workflow Automation

Tools: Git, Docker, Linux, Railway, Postman

AI Coding Agents: Claude Code, Codex, Windsurf, Devin, OpenCode, Cursor
